

Water Consumption: How Low Can You Go?

David Sampson

Research Scientist, Decision Center for a Desert City

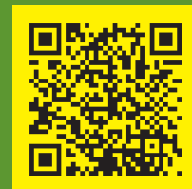

David will challenge the audience with questions regarding the amount of water we use for everyday activities. He will also discuss the tradeoffs in water-reduction management, comparing conservation measures to traditional and new approaches to demand management.

David is a research scientist and systems modeler. His background in systems modeling gave him the experience needed to earn a hydrological modeling position at ASU.

This event is part of ASU's "No Impact Week," a week-long series of events and experiments in low-carbon living. Register to receive daily emails on how to participate in the No Impact Experiment.

This event is co-sponsored with ASU's Decision Center for a Desert City.

Friday, September 30, 2011
12:00 – 1:30 p.m. (lunch will be served)
Wrigley Hall, Room 481
