

Do You See Garbage as a Resource?

ASU's School of Sustainability is pleased to partner with the Solid Waste Association of North America (SWANA) to offer a unique opportunity for students to explore the science and practice of the composting industry.

Covering the first four chapters of SWANA's Managing Composting Programs certification (a \$1,300 value), this one-day workshop begins with an understanding of composting's place in solid waste management and progresses to compost uses, markets, and quality—discounted to \$249 for students only.

This practical training presents biological principles of composting and examines different compost methods, techniques, and technologies—a great introduction for upcoming environmental engineers or eco-enthusiasts who are interested in the composting field.

SWANA is the leading source of solid waste education for facility policy-makers, managers, owners and operators, and industry consultants in North America. Thousands of solid waste professionals have participated in SWANA training programs.

Advance registration is required and is limited to students.

Questions? Contact Lindsey Donhauser, Program Manager at Lindsey.Donhauser@asu.edu or 480-727-3864.

Saturday, October 21, 2017
8:30 a.m. - 5:30 p.m.

Wrigley Hall, 4th Floor
