

A WRIGLEY SERIES LECTURE

THE NINE ELEMENTS OF A SUSTAINABLE CULTURE

Presented by the Wrigley Lecture Series on Sustainability
Co-hosted by the Office of the President, Arizona State University

• Mitchell S. Thomashow

President, Unity College in Maine

It is crucial that in uncertain economic times, we reiterate our commitment to sustainable approaches to all aspects of our lives. Broadly conceived, a sustainable culture for a college or university involves infrastructure, community, and learning. The infrastructure challenge involves (1) energy, (2) food, and (3) materials. The community challenge involves (4) governance, (5) investment, and (6) wellness. The learning challenge embodies (7) curriculum, (8) aesthetics, and (9) interpretation. The purpose of these guidelines is to open a discussion regarding the whole system of a sustainable culture.

Friday, March 6th, 2009 | 12:00 Noon

Global Institute of Sustainability, Room 481

Arizona State University, Tempe Campus
