

Thriving in a Water-Stressed World

Matt Howard

Director, Alliance for Water Stewardship - North America

We live in a water-stressed world and water-related risks surround us. Our economy is undergoing a shift in production and supply chains as water issues force companies to rethink their stewardship of water resources. How can we identify water risks and opportunities and, ultimately, mitigate those risks at industrial, agricultural, and municipal sites and within supply chains?

Howard oversees implementation of the International Water Stewardship Standard within companies and advocates for improving the sustainability of North America's freshwater resources.

Lunch will be provided.

Tuesday, November 10, 2015
12:00-1:15 p.m.

Wrigley Hall, Room 481
Arizona State University, Tempe campus

Parking and directions:
