

## Allies for the Anthropocene

### Fall Dialogue Series

A monthly conversation about thriving in the Anthropocene, featuring innovative thought leaders from ASU and beyond

### **“Restoring Carbon Balance: Eliminate Carbon or Build a Carbon Economy?”**

**Ellen B. Stechel**

Deputy Director ASU LightWorks<sup>®</sup> and

Professor of Practice, School of Molecular Sciences

October 26, 2017

ISTB4 Room 240

Ellen Stechel is Deputy Director, ASU LightWorks<sup>®</sup>, Professor of Practice in the School of Molecular Sciences, Senior Sustainability Scientist in the Julie Ann Wrigley Global Institute of Sustainability, and Fellow in the Institute for the Future of Innovation in Society. Her career has afforded her the opportunity to build and/or coordinate research programs at a National Laboratory, in Industry, at an agency in Washington, DC, and now in higher education; in both basic and applied research and in multi-disciplinary R&D management. She has held and holds numerous positions of an advisory or editorial capacity in several countries and has published >100 peer reviewed articles. Her current research focuses on materials and systems design of concentrating solar technologies to produce sustainable hydrogen and liquid hydrocarbons, clean water, and to store energy.

Save the Date!

Refreshments from 5:00 - 5:30 p.m.

Dialogue from 5:30 - 6:30 p.m.

We look forward to seeing you there!
