

Biochar and Sustainable Development: A Story About Working in Haiti

Ryan Delaney

Co-Director, Carbon Roots International

Ryan Delaney recently received his Master of Science degree from the School of Sustainability, where he researched technology adoption as a development tool at the community level in Haiti. Now his experience at the School of Sustainability assists him as co-director of Carbon Roots International, a small nonprofit engaged in agricultural- and fuel-based projects in Haiti. Delaney will discuss his experience starting this nonprofit agency, working in Haiti, the potential of biochar as a development tool, and the influence of the School of Sustainability in his work.

Thursday, October 13, 2011

11:30 a.m. – 12:30 p.m. (lunch will be served)
