

# Misadventures in Conservation and Development

## Candice Carr Kelman

*Assistant Director, School of Sustainability*

Governance issues are at the heart of successful biodiversity conservation and sustainable development. This presentation will highlight the role of institutions and multi-scalar governance in two Integrated Conservation and Development Projects (ICDPs) conducted in Indonesian national parks on the island of Borneo.

Dr. Carr Kelman studies policy dimensions of sustainability issues such as managing tradeoffs and fostering synergies between biodiversity conservation and human development. She has studied Integrated Conservation and Development Projects in Indonesian national parks, the global trade in electronic waste, and the regulation of electric utilities in the U.S.

This event is centered around the International Development and Sustainability challenge area.

**Friday, September 28, 2012**  
**12:00 - 1:30 p.m.**

(lunch will be provided)  
Wrigley Hall, Room 481
