When activist Debra White Plume's drinking water tested high for radiation, she set out to determine the cause. What she discovered alarmed her. *Crying Earth Rise Up* is an intimate portrait of the human cost of uranium mining and its impacts upon sacred water. This documentary tells a timely story of people fighting to protect land, water, and a way of life.

The film's director, Suree Towfighnia, will lead a post-film discussion.

Attendees are highly encouraged to bring donations of hotel-sized toiletry products for the homeless.
