

Who is Responsible for Climate Change?

Naomi Oreskes

*Science Historian and Author
Professor, University of California, San Diego Department of History
Adjunct Professor, Scripps Institution of Oceanography*

Naomi Oreskes has a long-standing interest in understanding the establishment of scientific consensus and the role and character of scientific dissent. For the past decade, she has primarily been interested in the problem of human-caused climate change. She has won numerous prizes, including the 2011 Climate Change Communicator of the Year.

Oreskes and co-author Erik Conway argue in their 2010 book, *Merchants of Doubt* that a loose-knit group of high-level scientists, with extensive political connections, have run effective campaigns for over four decades to mislead the public and deny well-established scientific knowledge about tobacco, acid rain, DDT, and, most importantly, climate change.

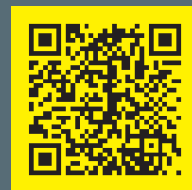

Monday, April 22, 2013

4:00 - 5:30 p.m.

Old Main, Carson Ballroom

Arizona State University, Tempe campus

(reception will follow)

RSVP link: Download any free QR-Code reader app to your smart phone. Scan this code and it will take you directly to the RSVP page.
