

Are Creative and Green Smart and Clean?

Kevin Stolarick

Research Director, Martin Prosperity Institute, University of Toronto

Clean, green, creative, and now smart cities have all been separately identified, measured, ranked, and evaluated. Are these titles really just different ways of talking about the same type of city? During this discussion, Kevin Stolarick will identify and compare creative, green, and smart cities and look for correlations.

Dubbed the “Official Statistician of the Creative Class,” Stolarick combines a depth of knowledge with an appreciation of the importance of finding and sharing knowledge with others. These “pearls of wisdom” come from his comprehensive understanding of the Creative Class and the Creative Economy.

Thursday, January 17, 2013
12:00 - 1:30 p.m.

Wrigley Hall, Room 481 (lunch will be provided)
Arizona State University, Tempe campus
