## Diagram your SNHI scores

Using the Average Scores for each of the 7 components on your Evaluation worksheet. Plot the scores on the corresponding line and connect each of the dots to make an polygon shape. Here is an example of what the finished diagrams should look like:

As you can see in the above examples, each diagram will look different. While one neighborhood may not have higher scores in all areas as compared to another, the size of the shape indicates which neighborhood is overall more sustainable. In the above diagrams, Diagram B is overall more sustainable than Diagram A.

Use the diagram below to plot your SNHI scores:
