Navigating an uncertain future

The face of our world is changing every day, and sometimes it seems that problems are growing faster than solutions. Climate change, food insecurity, ocean acidification, loss of biodiversity, water shortages, energy affordability, poverty, disease and many other challenges to sustainability are negatively impacting human well-being.

The School of Sustainability prepares students to view complex problems and solutions systemically, work collaboratively with people of differing perspectives, and create strategic solutions for a desirable, more sustainable future.

Bachelor of Arts in Sustainability
For students inclined toward social sciences, humanities, planning and related fields.
Tracks
• Society and Sustainability
• Policy and Governance in Sustainable Systems
• International Development and Sustainability
• Sustainable Urban Dynamics

Customize your experience:
• Study online or in person at the Tempe or Polytechnic campuses
• Pair sustainability with over 370 majors from other ASU colleges, including a concurrent degree program in supply chain management with ASU’s W. P. Carey School of Business
• Add depth to your degree with 110+ minors available at ASU

• Pursue a sustainability certificate or explore another 80+ certificates university-wide
• Complete two degrees in five years with our 4+1 accelerated bachelor’s/master’s program

I believe that we’re in a race with the things that are changing the world... The world’s great navigators are not just on the decks of canoes. They’re all around us... We need you to help show us the way. Our children need you.

—Nainoa Thompson
2018 Wrigley Lecturer and President, Polynesian Voyaging Society
I finally found a major that I was truly passionate about while being surrounded by amazing professors and peers that made Arizona feel like a second home to me. The School of Sustainability has given me opportunities beyond my wildest dreams, as it has given me the opportunity to study abroad in Ecuador, build connections with peers and companies both in and outside the U.S., and expand my knowledge on sustainability.

—Maryam Abdul Rashid, BA ’19

Founded in 2006 as the nation’s first School of Sustainability, today the school is recognized globally as the leading program of its kind.
